DATA ENGINEER

AWS Data Engineer | Python | SQL | PySpark | AWS | Databricks | ETL | Data Pipelines

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience designing and optimizing AWS-based data lake and warehouse architectures processing 3M+ records daily using Python, SQL, and PySpark. Improved pipeline efficiency by 60% through automation, distributed processing, and query optimization. Skilled in building scalable AWS data solutions using S3, Glue, Redshift, and Athena.

PROFESSIONAL EXPERIENCE

Application Developer (Data Engineer – AWS Data Platform) – IBM (Oct 2023 – Present)

- Designed and implemented batch ETL pipelines ingesting structured and semi-structured data into Amazon S3, transforming using AWS Glue (PySpark), and loading into Redshift for analytics.
- Designed S3 partitioning strategy (year/month/day) to optimize downstream query performance and reduce scan cost.
- Processed 3M+ records daily with partition-based optimization and Spark transformations (joins, aggregations, window functions).
- Implemented incremental data loads using Glue job bookmarks to reduce redundant processing.
- Optimized SQL queries using indexing, CTEs, partition pruning, and analytical functions, improving performance by 40%.
- Automated and monitored event-driven workflows using AWS Lambda, S3 triggers, and CloudWatch logs.

PROJECT – Retail Sales Analytics Data Platform on AWS

- Built scalable batch ETL pipeline processing **3M+ records/day** (CSV → S3 → Glue → Redshift).
- Implemented partitioned S3 data lake using **Parquet format**, improving query performance and optimizing storage.
- Designed **star schema** (fact + 5-dimension tables) in Redshift to support analytical reporting.
- Integrated **Glue job bookmarks** into existing ETL workflows and cut down on unnecessary data scans, this reduced AWS costs by 15% and improved overall system performance.
- Automated event-driven workflows using **Lambda and S3 triggers**, with validation, logging, and error handling for improved reliability.

TECHNICAL SKILLS

Cloud Platforms: AWS (S3, Glue, Lambda, Redshift, Athena, IAM, CloudWatch, Secrets Manager)

Programming & Query Languages: Python, SQL

Big Data & Processing: PySpark, AWS Glue, Batch Processing, Incremental Loads

Data Warehousing: Amazon Redshift, Snowflake (conceptual), Star Schema, Dimensional Modeling

Data Lake: Amazon S3 (Partitioning, Parquet Format, Data Lake Architecture)

Orchestration: Apache Airflow (concepts)

Databases: MySQL, Oracle SQL

Tools & Environment: Docker (local container setup), Git, CI/CD, Linux, Jira

Methodologies: Agile (Scrum), ETL/ELT

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- AWS Certified Developer - Associate
- Microsoft Azure Fundamentals (AZ-900)

EDUCATION

Kalpataru Institute of Technology, Tiptur

Bachelor of Engineering – Electronics & Communication Engineering (2019–2023).
